

# RSPB Wallasea Island Wild Coast Project

## The impact for river users

The RSPB have now submitted their planning application to Essex County Council for this major project.

- What does this project mean for sailors and other users of the rivers Crouch and Roach?
  - Stronger tides?
  - More silting up in the mouth of the Crouch?
- Will the construction cause a nuisance or worse?
- What has been learnt from the existing DEFRA project in 2006?

**Saturday 10<sup>th</sup> January – 5pm at the RBYC**

The RSPB and their consultants ABP will make a presentation on the studies, modelling and research relating to the Hydrodynamic Impacts on River Users

Your chance to hear answers to these questions and to ask your own.

**Everyone Welcome**  
(supper available afterwards)
